Profile

Product designer with 16+ years in enterprise SaaS, CRM, analytics and AI-assisted workflows. Turn complex information into clear experiences through research, interaction design and prototyping, partnering with product and engineering from discovery through release.

Skills and Tools

UX/UI, enterprise SaaS, AI workflows, interaction design, information architecture, research, prototyping, design systems, accessibility | Figma, FigJam, Adobe Creative Suite, HTML/CSS, Jira, Confluence, Codex, Claude, ChatGPT

Experience

LEAD UX DESIGNER | Puroresu Project | Jul 2026 - Present

- Designed and launched an interactive archive connecting 72 years of Japanese wrestling history, bringing scattered and Japanese-language sources into an accessible experience for international fans. Case study
- Created guided stories and curated discovery trails for newcomers, alongside searchable profiles and interactive lineage maps for experienced fans, helping readers understand how wrestlers, promotions and eras connect.
- Built a shared content system supporting 155 wrestler profiles, 126 curated matches and 48 venue histories, allowing corrections to carry across the archive and keeping historical records consistent as coverage expanded.
- Extended the archive into branded commerce by designing and launching an integrated Shopify storefront, carrying the project's visual identity into merchandise and giving fans another way to support and connect with the project.
- Generated over 1 Million (1,085,758) Instagram views, gained 5,400 net new followers, and drove 78,313 content interactions from August 1–October 29, 2026. Website analytics recorded 8,928 active users and 35,317 views from July 1–October 30, 2026.

Lead UX Designer | SugarAI (formerly SugarCRM) | Apr 2024 - Jul 2026

- Designed SugarAI's first AI report builder, taking sales reps and sales leaders from natural-language requests to reviewing and building reports, with direct editing, previews and version history to keep them in control. Case study
- Redesigned mobile CRM around customer visits, bringing preparation, AI-assisted answers, note capture and review into one connected workflow; prototype testing supported the approach for helping field reps update CRM without interrupting customer conversations. Case study
- Led and shipped two company-wide brand overhauls, unifying the front-end look and feel across Sugar's five-product stack, newly acquired tools and new features to deliver a consistent user experience for customers; rolled out to more than 3,000 customers.
- Onboarded, trained and mentored junior, midlevel and senior designers through weekly check-ins, design critiques and product guidance, fully integrating them into sprint teams in less than a month.

Senior UX Designer | SugarCRM | Nov 2019 - Apr 2024

- Led a responsive design initiative for SugarCRM's Flexible Dashboards, enabling sales reps, sales leaders and account managers to arrange, resize and share dashboard content around their workflows; rolled out to more than 2,000 customers.
- Led the design overhaul of SugarCRM's chart library during its migration from D3 to Chart.js, standardizing chart styles and interactions across the product stack to deliver consistent data visualizations.
- Maintained and evolved SugarCRM's UX component library through three UI theme changes, keeping reusable components aligned with the enterprise platform's evolving design standards.

Senior UX Designer | Hitachi Vantara / Pentaho | Sep 2013 - Nov 2019

- Led UX design for a Disney Space Mountain roller coaster maintenance experience deployed to approximately 22 ride engineers as a pilot, helping them review component health earlier and plan repairs overnight to avoid downtime during park hours. Connected mobile health alerts to linked work and parts requests. Case study
- Overhauled the front-end experience of Pentaho Data Integration (PDI), the ETL tool data engineers and analytics teams use to connect, transform, and move data across systems, modernizing its Spoon visual workflow interface with a Bootstrap 4 design system.
